

GoPro offers a budget-friendly action camera-- the Hero+, a model slotting between the GoPro Hero and Hero+ LCD with the inclusion of wifi and Bluetooth connectivity.

The Hero+ captures 1080p and 720p video at 60fps, as well as 8MP still, time lapse and burst photos. Meanwhile wifi and Bluetooth allow the live-streaming of footage to a mobile device.

However, unlike the Hero+ LCD it lacks a touchscreen and only captures video in an ultra-wide field of view.

The Hero+ is available from October 2015.
